Credit ratings in ThomsonOne(T1)

In ThomsonOne, in the Debt Overview module, you can find current and historical credit ratings from S&P, Moody’s and Fitch, for issuers and bonds.

Please note: You can only search on a company-by-company basis, so one company at a time. It is not possible to download ratings for several companies in one go.

Access

You can access ThomsonOne from home with via EZproxy. Make sure you use Internet Explorer; in other browsers ThomsonOne isn't displayed correctly. You can find the link in the list of (financial) databases.

Finding issuer ratings

1. Enter the name of the company in the box in the left upper corner of the screen.
2. Click the tab ‘Debt Overview’.
3. Under Issuer Ratings an overview of the current issuer ratings is shown and the date each rating was made. When you click the plus-button before a rating (when available), you can see the historical issuer rating of that type.
4. You can export the overview to Excel, by clicking the Excel button in the right upper corner of the screen.
Finding bond ratings

1. Enter the name of the company in the box in the left upper corner of the screen.
2. Click the tab ‘Debt Overview’.
3. Look at the bonds overview at the bottom of the page. (Categorized By)
4. Click on a particular bond.
5. A new screen will open. You can find the ratings and the dates (when available) in the right column, under the header Ratings.
